

VITASET

Everything from one source

The Vitoset range offers heating contractors all of the components required for domestic heating equipment.

Every Vitoset product meets the high quality demands with which Viessmann has always been synonymous. The Vitoset range is perfectly matched to all other Viessmann products. Further evidence of the technical expertise offered by Viessmann.

Heating contractors, however, profit not only from the high quality standards. Vitoset lightens the load and saves money, even where ordering, delivery and service are concerned.

Ordering is quick and easy by phone, fax or the internet. Everything from a single source and from one partner. Complete sets, e.g. an oil fired boiler with matching system components, such as an oil filter, an expansion vessel and a filling & drain valve are all offered under one part number.

The dense network of sales offices ensures the delivery of required products in next to no time to the place where they are required.

With Vitoset, Viessmann provides a complete range all around the heating system. A system solution with everything included.

Benefits at a glance:

Fuel storage

- Fuel oil tanks, 1000 to 2000 litres
- Fuel oil tank accessories
- Oil filter
- Pellet silos

Heat generation

- Diaphragm expansion vessel for sealed heating systems, colour Vitosilver, size 25 to 140 litres, also available in pure white (RAL 9010)
- Shut-off valves, safety valves, air-vent valves and dirt filters
- Small water softening system
- Single and twin wall stainless steel flue gas systems

DHW production

- Drinking water filter
- Diaphragm expansion vessels for DHW installation
- DHW circulation pumps
- Diaphragm safety valves for sealed DHW cylinders
- Fresh water module for DHW heating in accordance with the instantaneous water heater principle

Heat distribution

- Pipework
- Insulation material
- Shut-off valves, non-return valves
- Circulation pumps
- Low loss headers and Unit cascades
- Central heating mixer
- Plate-type heat exchanger for heat pump systems

Heat transfer

- Universal, flat panel and bathroom radiators
- Radiator accessories
- Underfloor heating system

For three generations, the Viessmann family business has been committed to generating heat conveniently, economically, with environmental responsibility and in accordance with the prevailing demand. With a number of outstanding product developments and problem-solving solutions, Viessmann has created many milestones which have frequently made them the technical pacemaker and trendsetter for their entire industry.

With the current comprehensive range, Viessmann offers its customers a stepped range of products with output from 1.5 kW to 20 000 kW: Freestanding and wall mounted boilers for oil and gas, either employing conventional or condensing technology, plus systems using renewable energy, such as heat pumps, solar heating systems and boilers for sustainable fuel supplies. The product range further includes control technology and data communication components, as well as the entire system periphery, including radiators and underfloor heating systems.

Viessmann's orientation is decidedly international – it maintains 11 factories in Germany, Austria, France, Canada, Poland and China, sales organisations in Germany and 35 other countries plus 112 sales offices around the world.

Responsibility for the environment and society at large, fairness in dealing with business partners and employees as well as striving for perfection and the highest efficiency in all business processes are core values for Viessmann. This applies to every individual employee and therefore to the whole company. It offers its customers, with the multitude of its products and associated services, the particular benefit and added value of a strong brand.

Energy sources:
 Oil, gas, solar, wood
 and environmental heat

Output range:
 From 1.5 to 20 000 kW

Program steps:
 100: Plus
 200: Comfort
 300: Excellence

System solutions:
 Perfectly matching
 products
